# About us

## Emtek Services is a leading supplier of high lift vehicles.

Based in the UK, we design and build high lift ground support equipment (GSE) for airports and road networks for a global market. Emtek provides vehicles for:

**PRM**

**Catering**

**Cleaning**

**Highway Maintenance**

### The Cartwright Group

We joined the Cartwright Group in 2017 and continue to provide class-leading vehicles under new directorship. The UK's leading trailer manufacturer and vehicle conversion specialist has over 65 years of engineering excellence making this family business ideally placed to take forward the Emtek brand.

Cartwright's vast capacity for manufacturing at its 38 acre site in Manchester combined with forward-thinking engineered solutions put us at the forefront of a rapidly expanding market. We will continue to harness the technical expertise of Emtek's founder, Mark Fowler, who remains with the company as technical director.

## Safe, Comfortable and Secure

### Key Features

- Seated passengers and wheelchair users
- VIP clients
- Intercom system
- Insulated body options

Our vehicles for passengers with reduced mobility (PRM) are the ideal transport solution for both seated passengers and wheelchair users. Emtek's engineers are experienced in designing patient transport vehicles and emergency ambulances for the NHS. Their knowledge in this area allows them to create cost-effective and comfortable vehicles for the safe transport of passengers with reduced mobility.

Choose from our standard specifications or speak with our experienced technicians who will work with you to create a fit-for-purpose solution. Each vehicle is fitted with interlocks and a programmable logic controller system as standard which are designed for optimal reliability.

# Catering & Cleaning

## Robust, Durable and Reliable

### Key Features

- Insulated body
- Refrigerated option
- Equipment and trolleys securely fixed
- Flush load lock option

Whether you're looking for an insulated or refrigerated high lift vehicle our robust catering and cleaning trucks can be configured to suit your needs. Load lock, shelving, tracking and other fixtures can be added to secure the equipment.

Choose from our standard specifications or speak with our experienced technicians who will work with you to create a fit-for-purpose solution. Each vehicle is fitted with interlocks and a programmable logic controller system as standard which are designed for optimal reliability.

# Maintenance Assist Vehicle (MAV)

## Highway's High Lift

### Key Features

- Servicing, repair and replacement of AMIs
- Safe working area
- Unique product for the market

Emtek's Maintenance Assist Vehicle (MAV) provides a safe way of accessing overhead gantries for servicing, repair and replacement of Advanced Motorway Indicators (AMIs) on the UK's roads.

As there is complete restricted access on the lightweight gantries, the MAV allows workers to remove the AMIs in a safe and secure environment. The workforce is currently restricted to 10mph wind speeds, whereas the MAV can work under conditions up to 50mph.

Designed to give motorway service providers a secure way of carrying out work under shelter, it can also carry up to five AMI units at any one time. The extending bridge and lanyards increase the safe working area and the built-in lighting allows you to continue working at night.
